## Professional Experience

### IT Support

**Mac Builder** | January 2022 - July 2022

- Provided technical support for desktop computers, laptops, printers, and other IT equipment.
- Diagnosed and resolved hardware, software, and network connectivity issues for end users.
- Installed, configured, and maintained Windows operating systems and business applications.
- Performed preventive maintenance, system upgrades, and troubleshooting to ensure optimal system performance.
- Assisted users with account setup, software installation, and technical issue resolution.
- Configured and maintained computer workstations, peripherals, and network devices.
- Monitored and documented technical issues, service requests, and resolution procedures.
- Coordinated with staff and internal teams for hardware repairs and system support.

## Projects

### http://Sauna.ph Website Development

Technologies: WordPress, HTML, CSS, JavaScript

- Assisted in the development and maintenance of the Sauna.ph company website during internship at SAWO Incorporated.
- Designed and implemented website layouts and page structures to improve user experience and visual presentation.
- Customized WordPress themes, content sections, and website components based on business requirements.
- Ensured responsive design and compatibility across desktop, tablet, and mobile devices.
- Performed website testing, content updates, and troubleshooting to maintain site functionality and performance.
- Collaborated with team members to implement website enhancements and design improvements.

### Daily Time Record (DTR) System

- Developed and maintained a DTR application using Oracle APEX, SQL, JavaScript, and CSS.
- Implemented attendance tracking, reporting, and data management features.
- Improved the accuracy and efficiency of employee timekeeping processes.

### Point of Sale (POS) System

Visual Basic 6.0, Microsoft Access/MySQL (whichever database you used)

- Designed and developed a desktop-based Point of Sale (POS) System as a college project.
- Implemented sales processing, inventory monitoring, and receipt generation features.
- Developed modules for product management, transaction recording, and sales reporting.
- Integrated a database for secure storage and retrieval of transaction records.
- Improved transaction efficiency through an intuitive user interface.

### Jail Management System (thesis)

Visual Basic 6.0, Microsoft Access/MySQL

- Developed a desktop-based Jail Management System for inmate information management.
- Created modules for inmate records, visitor logs, and administrative reporting.
- Designed database structures to store and manage inmate-related information securely.
